

Cable ladder 6 m 200 mm

E-no — MP-no 102LS6

Cableladder made of thinner material for indoor installations. The weight is 30% lighter, offering advantages both during installation and for the environment. The cable ladders are manufactured in pre-galvanized (20 µm) steel sheet and are suitable for environmental class C2. The perforated side allows for the installation of branches, angle brackets, etc. Additionally, the profile shape enables cables up to 19 mm in diameter to utilize over 98% of the width of the tray. The rungs are perforated (except for one closed in each end) and have a center-to-center distance of 250 mm. Breaking load: greater than or equal to 1.7 times the maximum load.
