

Internal splice MP-S NB: Only MP-S Ladders

E-no — MP-no 108S

Internal splice with snap-in action. Simplifies installation, especially for long straight sections, fit the splices in the ladders before lifting up and snap them together. Suitable for all MP-S ladders. The splice is used for whole ladders, but can be used when necessary if the ladder is cut exactly in the middle between two rungs. Meets requirements for equipotential bonding according SS-EN 61537:2001. Patent pending 11163803.7.
