

Cable ladder 6 m 400 mm

E-no — MP-no 154PZ

Industrial ladder with thicker sheet metal and higher load-bearing capacity. These are suitable for larger spaces such as industrial and warehouse halls. Made of hot dip galvanized metal (60 µm) and suitable for environmental class up to C4. This model features perforated-rung steps with a center-to-center distance of 250 mm (the second and fourth rung in each end is closed). The perforated side allows for the installation of branches, angle brackets, etc. Additionally, the profile shape enables cables up to 19 mm in diameter to utilize over 98% of the width of the steps. Breaking load: greater than or equal to 1.7 times the maximum load.
