

Telecom channel perforated 3 m 50 mm

E-no — MP-no 138Z4

Telecom channel for separation of power/telephone cables for use with cable ladder or wire mesh tray outdoors. The telecom channel is made of a zinc-magnesium alloy (25 µm) and is suitable for environmental class max C4. The advantage of this material is that it self-heals, for example when cut, and is a more durable alternative to traditional hot-dip galvanising. The large holes can be fitted with a 23 mm diameter rubber sleeve to prevent damage to cables (see E-no list 14).
