

## Wire mesh tray 200 mm

E-no — MP-no 723Z4

Wire mesh tray for flexible installations. The diameter of the wires is 5 mm. The wire mesh tray is made of a zinc-magnesium alloy (25 µm) and is suitable for environmental class max C4. The advantage of this material is that it self-heals, for example when cut, and is a more durable alternative to traditional hot-dip galvanising. Several of the accessories are shared with the rest of the MP range. Can be ordered in any painted colour.
