

Support yoke wire mesh tray 120-600 mm

E-no — MP-no 757E

Support yoke for wire mesh trays intended for widths 120–600 mm. The support yoke is made of electro-galvanised steel (10 µm) and is suitable for environmental class max C1. When mounting wire mesh trays in widths 300–600 mm, the support yoke can be supplemented with support to prevent the edges from bending down (11 166 70/11 166 71). Maximum load 80 kg. Ultimate failure load: 1.7 times the maximum load.
