

Corner splice wire mesh tray

E-no — MP-no 732S

Corner splice for wire mesh trays that makes making L, T and X branches easy. The splice is made of Sendzimir galvanised sheet (20 µm) and is suitable for environmental class max C2. Depending on the type of branch to be created, first cut the longitudinal or transverse rungs. Then fit the corner splice over the transverse rungs. To lock, insert a screwdriver into the square holes and bend the tongue between the wires of the ladder.
