

## Corner splice wire mesh tray

E-no - MP-no 732R

Corner splice for wire mesh trays that makes making L, T and X branches easy. The splice is made of acid-resistant steel and is suitable for environmental class max C5-M. Depending on the type of branch to be created, first cut the longitudinal or transverse rungs. Then fit the corner splice over the transverse rungs. To lock, insert a screwdriver into the square holes and bend the tongue between the wires of the ladder.
