

Universal bracket

E-no — MP-no 731S

Designed for universal fastening in the trays and for locking cantilever arm and angle brackets. For widths 300-600 mm, use a universal bracket in the bottom of the wire mesh tray to reinforce the joint. Fitted using MP fastening screw MP-937. The universal bracket can also be used as a cantilever arm clamp on the rear edge for all ladder types except MP-FZ.
