

Universal bracket

E-no — MP-no 731Z4

Universal bracket intended for universal fastenings when assembling cable ladders and wire mesh trays, as well as for locking cantilever arms and angle brackets. The bracket is made of a zinc-magnesium alloy (25 μ m) and is suitable for environmental class max C4. When mounting wire mesh trays in widths 300–600 mm, the universal bracket is used at the bottom of the ladder to strengthen the splice. For fitting with bolt set M8x16 mm (11 156 80). The universal bracket can also be used as a cantilever arm clamp at the rear edge for all ladder types except the reinforced ones.
