

## Roof support

E-no — MP-no PVX1

Roof support for mounting wire ladders with a width of 120–300 mm on flat roofs with a slope not exceeding five degrees. The support is placed on the roof, then the wire ladder is simply clicked in place with the included clip. Internal weight of approximately 1 kg. Please note that the clip must be placed over a transverse pin on the wire ladder to ensure that it does not slip off. To calculate the number of supports, use the calculation tool on this page:
