

Luminaire rail 3 m 75 mm

E-no — MP-no 311S

Luminaire rail with hole pattern for the most common 3- and 5-pin quick connectors on the market. The rail is made of Sendzimir galvanised sheet (20 µm) and is suitable for environmental class max C2. Other lengths, optional colours and hot-dip galvanised rail can be offered on request. Sendzimir galvanising is a method of corrosion protection, so variations in shade/appearance may occur. Bracket distance is determined by the length of the rail. 2 m rail = c-c 2 m; 3 m rail = c-c 3 m. A 6 m rail needs a wire suspension in the middle. These values apply at normal load.
