

Luminaire rail 3 m 75 mm

E-no — MP-no 311Z4

Luminaire rail with hole pattern for the most common 3- and 5-pin quick connectors on the market. The rail is made of a zinc-magnesium alloy (25 µm) and is suitable for environmental class max C4. The advantage of this material is that it self-heals, for example when cut, and is a more durable alternative to traditional hot-dip galvanising. Other lengths, optional colours and hot-dip galvanised rail can be offered on request. Bracket distance is determined by the length of the rail. 2 m rail = c-c 2 m; 3 m rail = c-c 3 m. A 6 m rail needs a wire suspension in the middle. These values apply at normal load.
