

Corner splice wire mesh tray

E-no — MP-no 732V

White-painted corner splice for wire mesh trays that makes making L, T and X branches easy. The splice is made of powder-coated sheet metal and is suitable for environmental class max C2. Depending on the type of branch to be created, first cut the longitudinal or transverse rungs. Then fit the corner splice over the transverse rungs. To lock, insert a screwdriver into the square holes and bend the tongue between the wires of the ladder.
