

Business Policy MP bolagen Industri AB

With quality and environment management we mean our our ability to satisfy the demands of stakeholders regarding:

- Appropriate products.
- Safe operation.
- Quick and safe deliveries.
- Keeping promises and agreed delivery times.
- Personal service.
- Reduced environmental impact in our processes.
- Follow applicable legislation.

Our way of working must always be directed towards simplifying and improving procedures and methods both in administration and production. The goal must be to perform tasks with zero errors, which affects both environmental and quality impact.

In addition, we shall ensure compliance with applicable laws and provisions.

Everyone at MP bolagen has a responsibility in regards to environment and quality and must be aware of the relevant requirements. Everyone must have sufficient knowledge and the resources to be able to live up to their responsibilities and have the opportunity to initiate measures to prevent errors and bring about improvements.

Quality and environment management cannot be achieved through supervision and checks, but can only be achieved through accurate and responsible work by each co-worker and collaborating partners.

The MP Group climate compensates through major forest ownership that binds carbon dioxide.

Evert Karlsson, CEO, MP bolagen Industri AB
