

## Pre-equipped floor box

The floor box comes fully equipped upon delivery! The floor box can either be installed directly in a recess in a floor or embedded in concrete. Device boxes, a 4-way power outlet, and a mounting plate for 2x keystone are included in the delivery. If you want to embed it or need a special mounting plate for low voltage, these can be purchased separately. The floor box has space for carpet or flooring with a maximum thickness of 8 mm.
